

CARDIAC HEALTH SCREENING

Price: £2,500

The Cardiac Health Screening package offers a comprehensive assessment of your heart's structure and rhythm, providing a good indication on your risk of developing a heart condition.

Following a consultation with our Cardiology Consultant, investigations will be undertaken to identify structural abnormalities of the heart and look for inherited abnormalities, helping to also detect other heart disease or heart rhythm changes, such as atrial fibrillation and heart block.

Cardiac Health Screening includes:

- Initial and Follow up Cardiology Consultations (30 mins each)
- Baseline Medical Assessment
- 12 Lead Resting Electrocardiogram
- 3D Body Scan
- Detailed Blood Test
- Urine Analysis
- Cardiopulmonary Exercise Test
- Resting Transthoracic echocardiogram
- Carotid Ultrasound

Additional tests may be required following your consultation, these could include:

- Genetic Test for Cardiovascular Risk
- CT Coronary Angiogram
- Cardiac MRI
