The Basic Screening is a general health assessment to detect potential signs of disease or changes in the body as early as possible. This screening is recommended for all age groups and takes in total approximately two hours to complete.

Starting with a baseline medical assessment measuring main health parameters such as blood pressure, pulse, oxygen levels and a 12 lead resting Electrocardiogram (a non-invasive test that can detect abnormalities of your heart).

The screening will finish with a 30 minute doctor consultation to discuss your results and give you further guidance if required.

Basic Health Screening includes:

- Initial and Follow up Doctor Consultations (30 mins each)
- 12 Lead Resting Electrocardiogram
- 3D Body Scan
- Detailed Blood Test
- Urine Analysis
- Follow up Doctor Consultation
